Know n' Grow™ Offers Greenhouse-To-Door
Vegetable Garden Kits
Gardening Kits Under \$100 At www.knowNgrow.biz

Ovid, MI – According to a recent study by the National Gardening Association, more than 43 million U.S. households plan to grow their own fruits, vegetables, herbs and berries in 2009, up 19 percent from 36 million households in 2008. As millions of American families get ready to dig in to this exploding gardening movement, Know n' Grow™ is introducing a way to streamline the gardening process with easy-to-order vegetable gardening kits sold at www.knowNgrow.biz.

“It’s not surprising that families are recognizing the benefits of vegetable gardening,” said Dr. William H. Carlson, founder of Know n' Grow™. “Gardening is not only a great way to grow your own groceries but it’s also a very rewarding activity. Gardening kits from Know n' Grow™ will make the gardening experience less overwhelming and more enjoyable.”

For the first time, Know n' Grow is offering a variety of professionally-planned gardens featuring many All-America Selections®, which are hardy, high-yielding vegetable varieties. Most are available as low maintenance, easily planted established plants in four-inch pots. Gardeners should order immediately to reserve these award winning vegetable plants. All garden kits will be shipped to the customer’s home at the optimal planting time in specially designed protective boxes, via UPS, ensuring the plants arrive in top-quality condition. Ground shipping is included in the retail price of the gardens. We also offer an air shipping option to outlying UPS shipping zones a small additional charge.

Know n' Grow™ Garden Kits

Know n' Grow™ garden kits come in four convenient sizes and all retail for less than \$100. These gardening options are perfect for either new gardeners or for those who want a convenient, easy-to-install garden.

- **The Backyard Garden** - Designed for a 27' by 10' plot, consists of thirty-two 4" plants (tomatoes, broccoli, eggplants, peppers, and herbs) 16 lettuce plugs, 100 onion sets, as well as varieties of squash, bean and cucumber seeds. Retail for \$97.30 including ground shipping.

- **The Hobby Garden** - Designed to fit an 18' by 10' plot. This garden contains twenty-one 4" plants (tomatoes, broccoli, eggplants, peppers, and herbs), 12 lettuce plugs, 50 onion sets, as well as squash, bean and cucumber seeds. The Hobby Garden retails for \$63.40 including ground shipping.

- **Container Gardens** - Know n' Grow™ has also designed two container vegetable gardens.
 - **The Kitchen Garden** - Specially designed for twelve containers, consists of thirteen 4" plants (tomatoes, peppers, and herbs), lettuce plugs, bean and cucumber seeds. The Kitchen Garden retail price is \$37.45 including ground shipping (containers not included).

 - **The Patio Garden** - Designed for a small-container setting and consists of eight 4" plants (tomatoes, peppers, and herbs), lettuce plugs, and cucumber seeds. The cost is \$25.20 including ground shipping.

For customers who want to add to one of the garden kits, or, for those who wish to design their own garden, Know n' Grow™ provides an "Ala Carte" menu, where individual plants may be selected. The website, www.knowNgrow.biz, also offers useful information on starting a vegetable garden. Gardeners are encouraged to order early, as supplies are limited.

More About Know n' Grow™

The Know n' Grow™ project combines the growing and shipping expertise of Mischel's Greenhouses Ltd., a premier grower located in Williamsburg, Michigan, and Dr. William H. Carlson, a distinguished professor emeritus in horticulture from Michigan State University. Mischel's Greenhouse has over 20 years experience in shipping quality plants from their greenhouse to the customer's front door. Dr. Carlson had over 30 years experience in directing the Horticultural Extension Program at MSU. Committed to providing excellent products and service, Know n' Grow™ guarantees customer satisfaction.
